BeaMe

Public Seating

Design: Perch

We specialise in research-led design for applied human movement. We conduct quantitative and qualitative research, to find out how people communicate, congregate, work and learn. Our passion is developing new solutions in emergent fields, to improve the quality of life for people.

We consider ergonomics, psychology and aesthetics as equally important and we are hugely excited to be developing new and elegant solutions for GreyFox.

BeaMe - Conscientious Public Seating

Fun, Light, Important.

At it's heart, BeaMe is light, modular, strong and most importantly, sustainable. The use of GluLam wooden beams, replaces a more traditional steel structure. Now, you can build longer, lighter and more sustainable beam seating, that can be assembled with one tool, in minutes.

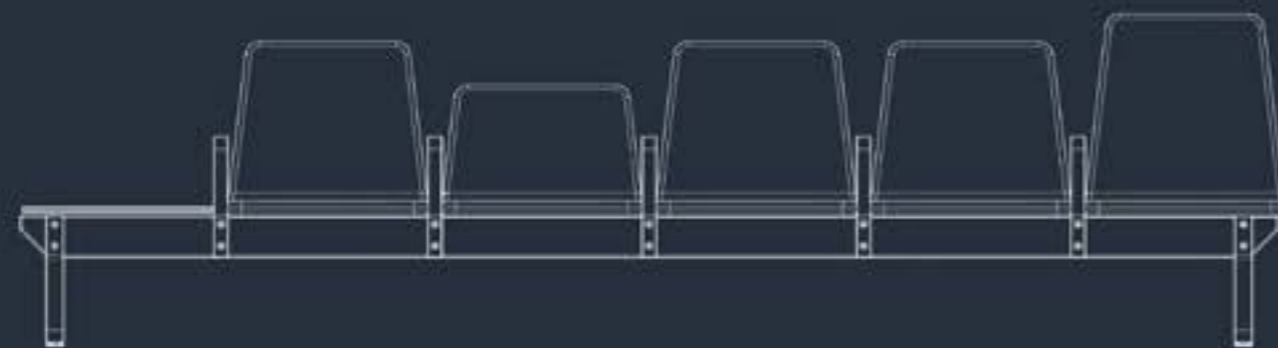

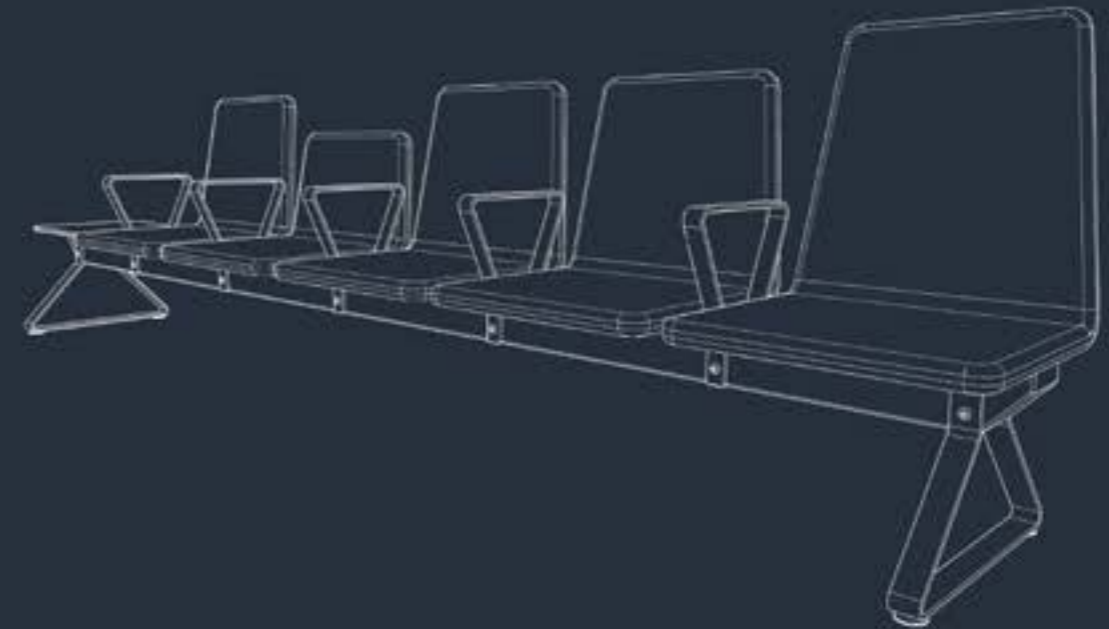

When we start with a focus, purely on the Human; their psychological, physiological and biophilic needs, we find that the concept, for something new and meaningful, designs itself.

Simple, Modular, Elegant

BeaMe is innovative, ecological and beautiful. Build it at any length, with any configuration and be impressed by how simple it is to install and repair.

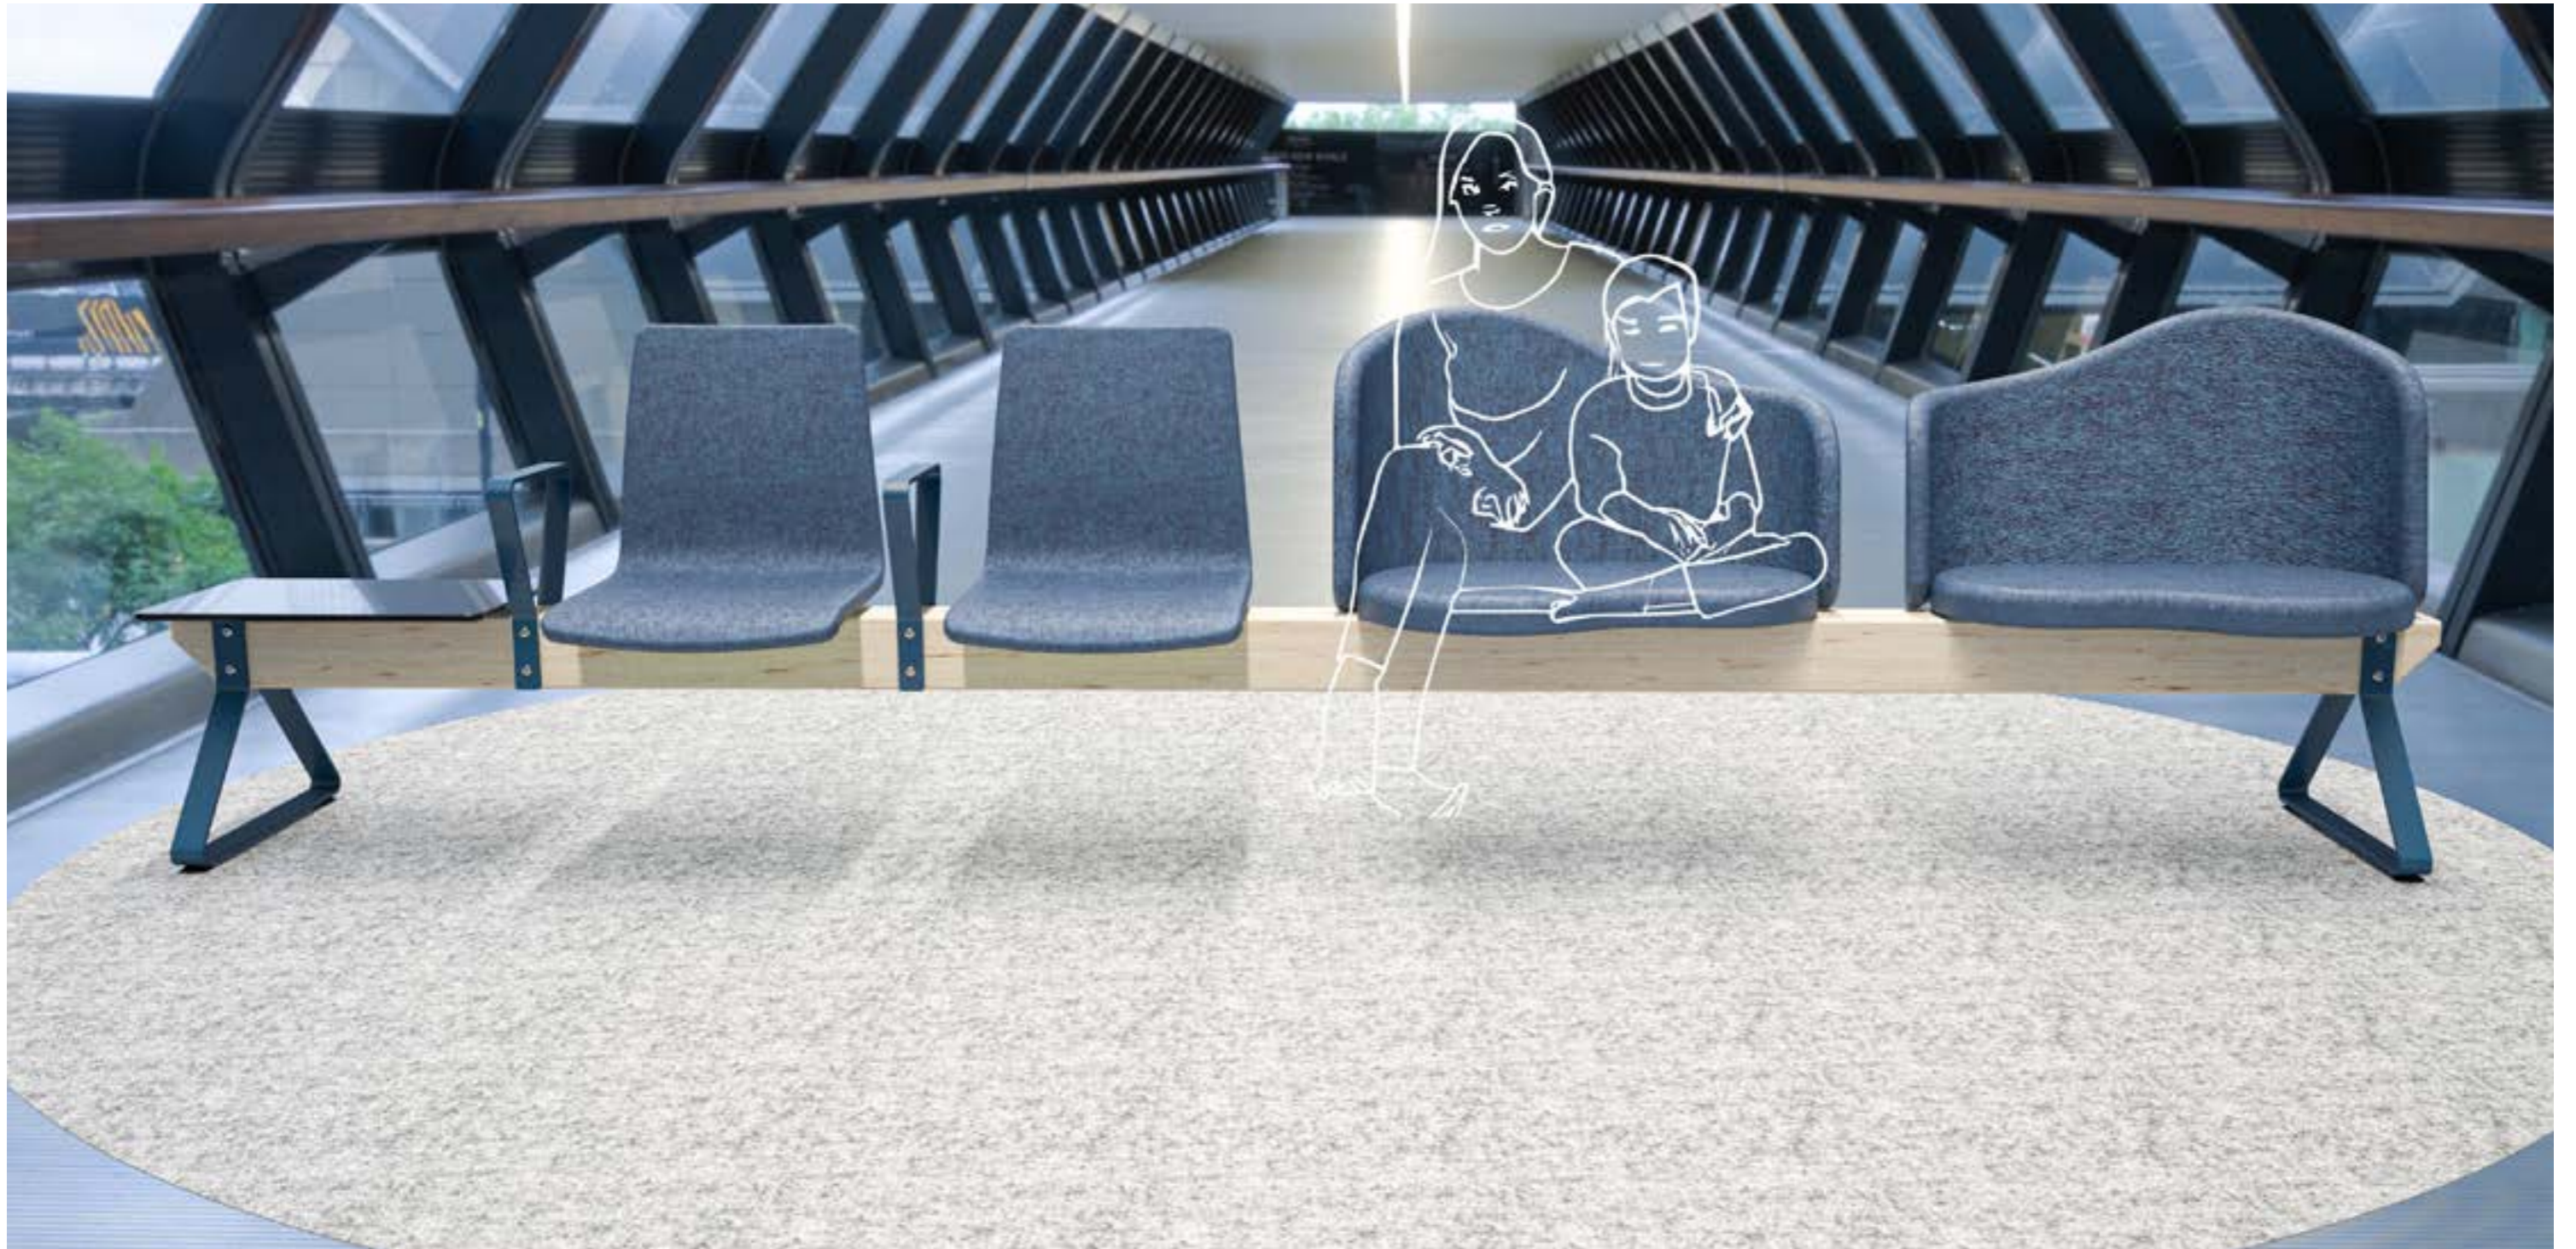

Childs Play

Modular

Parent & Child

A double seater option for those moments, where having those close to you, be close to you.

Colour Match your configurations

Matching or contrasting colours for the upholstery and metalwork.

Create something truly unique and responsible
Easy to configure, assemble, repair and disassemble.

Glue Laminated Beams

are lightweight, naturally fire retardant, dimensionally stable and offer superior strength.

These square section beams are made from a very sustainable softwood and are strong enough to be used in the construction industry.

The limitations of steel are no longer a barrier to your seating requirements. BeaMe can be specified in any length up to 12 metres long, so if it can fit in your building, we can build it for you.

From 2-18 seats

Lightweight & Modular

Ideal in public spaces with limitless combinations.

Public Spaces

Modular

A furniture collection

that is as flexible as you are. For areas of high volume use, such as Schools & Universities, Hospitals and Airports.

Elegant

Colourful

Any Congifuration, across any length

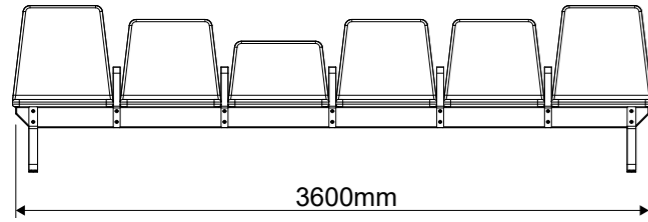

BeaMe can be assembled and reconfigured very simply, with a single tool and no special training.

Better workplaces in a better world

At GreyFox the principles of longevity, purpose and sustainability guide everything we do; we've built our processes around them. Our furniture is designed to promote the health of its users, whilst sustaining the health of our planet.

Our clients buy less because our products do more. They stand the test of time and the demands of their users.

Our furniture is designed to be easily maintained, renewed and serviced. We keep our products out of landfill, we take them back at end of life and ensure they are repurposed. We manufacture our products locally. We stand over and ensure the sustainability of all stages of our product development.

Our conscience guides the selection of our materials and suppliers. We want to produce furniture made of sustainably forested woods, natural fabrics and water based finishes.

At GreyFox, our commitment to sustainability is resolute. Our environmental conscience guides what we do and will adapt and evolve with us. We design and manufacture for better workplaces in a better world.

With love, care and attention,
in Ireland
