

GreyFox // Sustainability

We design and manufacture for better workplaces in a better world. At GreyFox the principles of longevity, purpose and sustainability guide everything we do; we've built our processes around them. Our furniture is designed to promote the health of its users, whilst sustaining the health of our planet. Our customers buy less because our products do more. They stand the test of time and the demands of their users. Our furniture is designed to be easily maintained, renewed and serviced.

We stand over and ensure the sustainability of all stages of our product development. We are conscious of our impact in the selection of our materials and suppliers. We want to produce furniture made of sustainably forested woods, natural fabrics and water based finishes. We also keep our products out of landfill by taking them back at end of life to ensure that they are repurposed. We source our materials and manufacture our products locally. All off cuts in the manufacturing process are also put to good use as we repurpose them to create marketing materials.

We are always looking for new solutions and innovations to achieve our zero waste goal and recently were awarded first place in the **Green and Sustainability Category** at the **Local Enterprise Offices 2022 Awards in Dublin**.

Other innovative design features within the collection include metal to metal fixings, rather than glues, for easy disassembly. This is useful for servicing products and reusing/recycling components at end-of-life to reduce waste.
